

Investment in Our Bridge Infrastructure

City Department of Transportation and Engineering (DOTE) Bridges

Maintenance, repair, and replacement of City (DOTE) bridges is funded with both operating and capital funds. City funds are leveraged, when possible, with state and federal funds.

DOTE's goals are to maintain a weighted average bridge rating of 6, "Satisfactory" condition, or better and to have at least 95% of City (DOTE) bridges open without load restrictions. The Smale Commission Report recommended the annual investment of \$1,000,000 in Operating funds and \$2,800,000 in Capital funds to maintain the city's bridge infrastructure. This recommendation was in 1988 dollars to maintain a deck area of approximately 1,000,000 square feet. Today, DOTE maintains approximately 1,325,000 square feet of bridge deck area. The most significant increase in bridge deck area occurred as a result of the Fort Washington Way and Central Riverfront construction. Deck area is expected to grow in the near future with the completion of Freedom Way in the Central Riverfront and the addition of two new bridges planned to be constructed as part of the Kennedy Connector project. Current Operating and Capital funding levels for City bridges are \$178,700 and \$1,100,000 respectively (excluding funding for the Waldvogel Viaduct project and other special projects). At this current funding level, a general decline in the condition of City (DOTE) is expected unless those funds can be significantly leveraged with money from other outside sources.

County Bridges

By contractual agreement with Hamilton County, the City of Cincinnati receives \$1,000,000 annually to inspect and maintain bridges that support improved roads which are of general and public utility running into or through Cincinnati. This funding level has remained constant since the initiation of the agreement in the late 1970's. At this current funding level, a general decline in the condition of County bridges is expected, unless those funds can continue to be significantly leveraged from other outside sources. As with City funds, Hamilton County funds are leveraged, when possible, with state and federal funds.

Leveraged Funding Summary

DOTE continues to aggressively pursue outside funding sources to maintain Cincinnati's public infrastructure. Successful leveraging of outside funds is imperative to maintain and improve the condition of Cincinnati's bridges.

The following tables indicate the amount of outside funding that the City has obtained in recent years for the Bridge Program. A significant percentage of the obtained leveraged funding was for County bridges. Because of the generally higher traffic volumes, the funds received from Hamilton County are more likely to be successfully leveraged with outside funding sources.
